GLAZZYS
DIESEL SERVICES

Heavy Earthmoving Equipment Specialists | Est. 2022 | Nationwide

ABOUT US

Glazzys Diesel Services was established in 2022 with a clear purpose: to deliver expert diesel repair, maintenance and field support for heavy earthmoving equipment across Australia's most demanding industries, including mining, civil and transport.

Our team of qualified diesel mechanics, field servicemen and auto electricians brings hands-on expertise and a no-shortcuts approach to every job. We are ARC qualified, so we can also look after the air-conditioning on your machines and vehicles. Whether it's a scheduled service or an unplanned breakdown in a remote location, we show up equipped and ready to get your machinery back online with minimal downtime.

We're not a call centre. Every client works directly with our technical team, and every solution is tailored to the specific demands of your equipment and operation.

OUR PEOPLE

The strength of Glazzys Diesel Services lies in our people. Our diesel mechanics and servicemen hold current trade qualifications and bring extensive field experience across CAT, Komatsu and other major OEM platforms, and our team is ARC qualified. Working across mine sites, civil projects and remote operations, our team operates with precision, safety and professionalism.

Diesel Mechanics

Fully qualified tradespeople with experience in heavy earthmoving, mining fleet and civil equipment. Capable of performing everything from component-level repairs to full engine overhauls.

Field Servicemen

Dedicated field technicians who travel to your site equipped for preventative maintenance, unplanned breakdowns and diagnostics. Available nationwide for both scheduled and rapid-response callouts.

Auto Electricians

Qualified auto electricians we can supply alongside our diesel team, so electrical faults on your equipment can be handled by one contractor.

OUR CAPABILITIES

Unplanned Field Maintenance

Comprehensive on-site repair for all types of heavy earthmoving machinery, from minor repairs through to major overhauls. We mobilise rapidly with fully stocked vehicles, no matter the location.

Preventative Maintenance

Customised maintenance programs designed to prevent costly breakdowns and extend equipment life. Scheduled servicing built around your operational requirements and OEM specifications.

Diagnostic Services

Advanced diagnostic tools and techniques for accurate fault identification and efficient resolution. Our technicians work across OEM platforms and have access to dealer-level diagnostic equipment.

Engine Overhaul & Rebuild

Full mechanical strip-down, assessment and rebuild for diesel engines across a range of heavy equipment makes and models. Returned to manufacturer specifications with documented completion reports.

Hydraulic Services

On-site hydraulic fault diagnosis, hose fabrication and repair. Our custom hose container enables same-day hose replacement for sizes -4 through to -32 at any location.

Air-Conditioning

ARC qualified technicians for air-conditioning repairs and servicing on machines and vehicles. We make and install air-conditioning hoses on site.

Component Exchange & Parts Sourcing

Fast identification and sourcing of replacement components to reduce machine downtime. We work with established supplier networks to keep your equipment moving.

Auto Electrical

Qualified auto electricians for electrical fault finding and repair on heavy equipment, supplied alongside our diesel mechanics.

MOBILE WORKSHOP PACKAGE

Glazzys Diesel Services offers a fully self-contained Mobile Workshop Package, purpose-built to operate in remote and challenging environments with everything required to service and repair heavy earthmoving equipment on-site.

The package is designed for mine sites, civil projects and remote infrastructure where access to a fixed workshop is not viable. Each component of the package is configured, tooled and ready to deploy.

Tooling Container

A dedicated tooling container stocked with a full suite of hand tools, power tools, lifting equipment and speciality tooling required for heavy diesel maintenance and repair. Configured to maximise workflow efficiency and ensure technicians have what they need at hand.

Storage Container

Secure, weatherproof storage for consumables, parts inventory and ancillary equipment. Keeps the workshop organised and ensures critical stock is protected and accessible throughout the engagement.

Hose Container

A fully equipped mobile hose workshop capable of fabricating hydraulic hoses from -4 through to -32 on-site. Eliminates the lead time and cost associated with off-site hose procurement and minimises hydraulic-related downtime.

Bunded IBC Container

A purpose-built bunded IBC container for the safe storage and dispensing of oils, lubricants and fluids. Fully compliant with environmental containment requirements, critical for mine site and environmentally sensitive operations.

SUPPORTING EQUIPMENT & FACILITIES

40' Igloo Service Shelter

All-weather mobile workshop shelter, fully fitted with required tooling. Provides a weatherproof work environment enabling fast equipment turnaround regardless of site conditions.

Caterpillar Integrated Tool Carrier

Purpose-built CAT Integrated Tool Carrier supporting the full mobile workshop operation. Provides the infrastructure to keep the field workshop running at peak efficiency.

Rapid Response Breakdown Vehicles

Fully equipped rapid response service vehicles deployed for unplanned breakdowns. Each vehicle carries compressors, generators, diagnostic laptops and a comprehensive tool inventory.

Speciality Tooling

An extensive range of OEM-specific and speciality tools for handling high-complexity jobs across major equipment platforms. Regularly updated to keep pace with fleet requirements.

OUR VALUES

Quality: We are committed to the highest standard of workmanship, ensuring every diesel engine and component we touch operates at peak performance and reliability.

Accountability: We take ownership of our work and stand behind every job. Transparency and integrity are non-negotiable in every client interaction.

Reliability: Our clients trust us to show up, be prepared and deliver consistent results, whether it's a scheduled maintenance run or a critical breakdown callout.

Pride: We take genuine pride in our craft. For us, every machine we service is a reflection of our standards and our passion for the industry.

OUR REACH

While our roots are in the Australian resources sector, Glazzys Diesel Services operates nationally. Our reputation for quality, responsiveness and on-site capability has seen us engage clients from coast to coast across mining, civil and transport sectors.

With fully mobile workshop infrastructure, rapid-response vehicles and a team experienced in remote site logistics, we can mobilise to your location and deliver a complete, self-sufficient service capability, wherever your operations take you.
